

Any report. Any way. Right Now.™

Jet Reports 2009 Features

▶ Extends The Power Of Excel

Use all Excel functionality that you already know to build reports with impact and effectiveness.

▶ Report Builder

The new report builder makes it easy to build reports, even if you don't know where to find the data or how to link the tables.

▶ Enhanced Scheduler

The report scheduler has a new look and feel that includes a wizard approach for new users and provides advanced users the flexibility to quickly set up scheduled reports.

▶ Browser

The new browser offers a clean and easy interface that allows you to drag and drop fields to create or update reports.

▶ New Jet Formulas

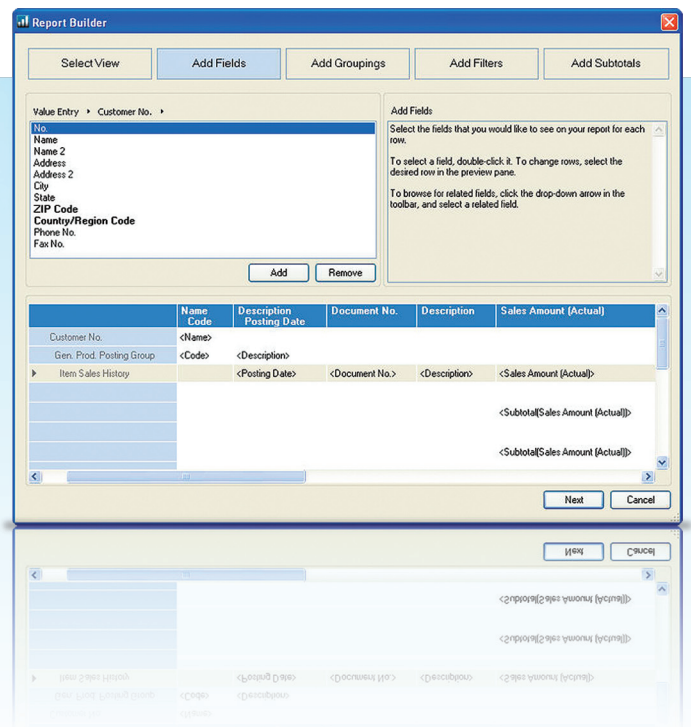

Advanced linking allows you to easily create reports where the field that you need to use or filter is not on the table that you need.

▶ Data Views

Leverage your expertise using data views to create a customized reporting experience. Supports all customizations for vertical and custom applications.

▶ Better Performance

On average 2x faster than previous versions of Jet Reports.

Report Builder - A Closer Look

Build reports in minutes

- ▶ Create reports quickly using Data Views to simplify finding your data.
- ▶ Combine data from multiple areas of your database into one report.
- ▶ Report Builder ensures best practices for performance in every report.

Report Builder lets you create many types of multi-table reports. Report Builder presents categories of information to you so you can choose data views that best represent the type of report you want. Select fields for your reports, set groupings and subtotals, set filters and set report parameters as report options. Get well formed reports in minutes.

Powerful reporting at your fingertips. All in Excel.

Jet Reports 2009 Excel Ribbon

Jet Reports—In Depth Look at the 2009 Jet Features

Extend The Power Of Excel

Use all Excel functionality that you already know to build reports with impact and effectiveness.

- ▶ Add charts into your reports.
- ▶ Add formatting and conditional formatting to highlight the most relevant information.
- ▶ Add Excel functions for calculated numbers and what-if analysis right in the report.

Jet Reports supports all Excel calculations, date functions, formatting, conditional formatting, charting, validation and lists, PivotTables and more right in your reports. Use the Excel linking and grouping to do in-report drilldown of more data.

Enhanced Scheduler

Schedule reports for automatic distribution.

- ▶ Automate the refreshing and distribution of reports to your team.
- ▶ Show a summary of the report in the email body so people know the key information immediately.
- ▶ SMTP and Outlook support for email.

The scheduler allows you to schedule reports daily, weekly, monthly—on your schedule. The scheduler refreshes the reports with filters you define, then sends the report by email to your defined list of recipients.

Browser

The new browser offers a clean and easy interface that allows you to drag and drop fields to create or update reports.

- ▶ See all tables and fields even customized tables and field and third party granules in the Browser.

Drag and drop fields inside the Jet Browser, then you can edit the functions in Excel to get the report exactly the way you want it.

New Jet Formulas

Advanced linking allows you to easily create reports where the field that you need to use or filter is not on the table that you need.

Data Views

Simplify your view into your database with Data Views.

- ▶ Data Views are based on your NAV data dictionaries.
- ▶ Data Views list only the fields and connected tables you want to see.
- ▶ Edit, create, import/export and associate to data sources your Data Views to easily achieve your optimal report creation data.

Report Builder uses Data Views to present the best possible set of fields which simplifies report creation. Users no longer have to worry about how they get to a field or gather fields from related tables. Data Views presents the relevant set of fields they need. Data Views can include customizations for vertical and custom applications.

Better Performance

Achieve best performance possible with Excel based reporting.

- ▶ On average 2x faster than previous versions of Jet Reports.
- ▶ Report Builder ensures best possible performance through best practices of report design.
